

Blue Cross Coordinated Care SuiteSM

Here to provide more resources for specific health conditions

The value of Suite

Suite offers a collection of digital health solutions to provide an additional level of support for your employees and their family members with specific health care needs. Suite is designed to be paired with either Blue Cross Coordinated Care **NavigatorSM** or Blue Cross Coordinated Care **AdvocateSM**.

Suite offers:

- **Diabetes and hypertension solutions**  **Livongo**
by Teladoc Health

Most adults with diabetes, prediabetes or hypertension have at least one comorbid condition. That's why we offer three Livongo data-driven, digital solutions that focus on the whole person, not just individual conditions. Available options include:

- Diabetes management
- Prediabetes management
- Hypertension management

These programs provide comprehensive, integrated support for comorbid conditions, such as obesity, hypertension, high cholesterol and mental health.

- **Expert medical opinions**  **2nd.MD**

This solution gives members facing a difficult diagnosis access to board-certified, leading doctors across the nation for an expert second opinion by phone or video within three to five days.

Livongo is an independent company providing diabetes and hypertension management assistance to Blue Cross members. 2nd.MD is an independent company providing medical second opinions to Blue Cross members.
