

15-Day Specialty Drug Limitation Program

February 2024

The 15-Day Specialty Drug Limitation Program limits the days' supply of medication that can be dispensed to help Blue Cross Blue Shield of Michigan and Blue Care Network members save on copays and reduce waste.

Drugs in this 15-day program are limited to a 15-day supply for the first six fills. For the seventh fill, these drugs can be filled as a 15-day supply or as a 30-day supply (or whatever the default day-supply limit is for that group). Members pay half of their copayment for a 15-day supply and their full copayment for the 30-day supply.

Note: Members who have had six 15-day supply prescriptions filled within the last six months will qualify for up to a 30-day supply.

These drugs may require a prior authorization.

15-Day Specialty Drug List
