Confidence comes with every card.®

## Urgent care centers

# There's a place for that.

You don't need an appointment to walk in to an urgent care center for convenient, in-person care — even late at night or on weekends. Need lab tests or an X-ray? Some centers offer those, too.

**At urgent care centers, you can get treatment for minor illnesses such as:**

- Sore throat and cough
- Colds and flu
- Low-grade fever
- Mild allergy symptoms
- Painful urination

**Find an urgent care center near you.**
