What's a health savings account?

An HSA is like a 401(k) account for your health care. It gives you control of health care expenses when combined with a health plan. If your employer offers an HSA, you can use it to pay for current health care expenses as well as save for future qualified medical expenses, including retiree health expenses.

You can open and contribute to an HSA if you:

- Are enrolled in a Blue Care Network HSA-qualified high deductible health plan
- Can't be claimed as a dependent on someone else's tax return
- Aren't already enrolled in another health care plan that isn't an HSA-qualified plan
- Aren't enrolled in Medicare

The advantages of an HSA

Control – You decide how and when to spend the money.

Convenience – You can access money in your account with an HSA debit card.

Flexibility – Use money in your account to pay for current qualified medical expenses, including those your health plan may not cover, or save the money for future needs.

Portability – If you change jobs, move to another state or become unemployed, your HSA moves with you.

Savings – Save money for future medical expenses, and grow your account through investment earnings.

Tax benefits – Contributions to your HSA are pre-tax, meaning no tax is collected, and none will be applied if the money is spent on qualified medical expenses.

What happens after you sign up for an HSA

Once you've enrolled in your health plan, you'll receive a welcome kit from HealthEquity® with information on how to access and use your HSA.

HealthEquity
Building Health Savings™

HealthEquity is one of the nation's oldest and largest HSA administrators and provides hassle-free and seamless service. It's an independent company supporting Blue Care Network by administering your HSA and providing HSA services.

Blue Care Network of Michigan is a nonprofit corporation and independent licensee of the Blue Cross and Blue Shield Association.
