Medical benefit drug policies are a source for BCBSM and BCN medical policy information only. These documents are not to be used to determine benefits or reimbursement. Please reference the appropriate certificate or contract for benefit information. This policy may be updated and therefore subject to change.

Effective Date: 04/11/2024

Gazyva® (obinutuzumab)

HCPCS: J9301

Policy:

Requests must be supported by submission of chart notes and patient specific documentation.

Note: This policy pertains to Medicare Part B only

- A. Coverage of the requested drug is provided when all the following are met:
 - a. FDA approved age
 - b. Treatment-naïve chronic lymphocytic leukemia (CLL) patients
 - i. Must be receiving concurrent chlorambucil therapy
 - OR
 - c. Follicular lymphoma (FL) patients relapsed/refractory to rituximab-containing regimen
 - i. Must be receiving concurrent bendamustine therapy, followed by Gazyva monotherapy
 - OR
 - d. Treatment-naïve FL patients
 - i. Must be receiving concurrent chemotherapy (bendamustine, CHOP, or CVP), followed by Gazyva monotherapy
- B. Quantity Limitations, Authorization Period and Renewal Criteria
 - a. Quantity Limits: Align with FDA recommended dosing
 - b. Initial Authorization Period: Aligns with FDA recommended or guideline supported treatment duration and provided for at least 60 days and up to 6 months at a time
 - c. Renewal Criteria: Clinical documentation must be provided to confirm that current criteria are met and that the medication is providing clinical benefit

***Note: Coverage and approval duration may differ for Medicare Part B members based on any applicable criteria outlined in Local Coverage Determinations (LCD) or National Coverage Determinations (NCD) as determined by Center for Medicare and Medicaid Services (CMS). See the CMS website at <http://www.cms.hhs.gov/>. Determination of coverage of Part B drugs is based on medically accepted indications which have supported citations included or approved for inclusion determined by CMS approved compendia.

Background Information:

- Gazyva is a CD20-directed cytolytic antibody indicated:
 - In combination with chlorambucil, for the treatment of patients with previously untreated chronic lymphocytic leukemia.
 - In combination with bendamustine followed by Gazyva monotherapy for the treatment of patients with follicular lymphoma who relapsed after, or are refractory to, a rituximab-containing regimen.
 - In combination with chemotherapy followed by Gazyva monotherapy in patients achieving at least a partial remission, for the treatment of adult patients with previously untreated stage II bulky, III or IV follicular lymphoma.
