HEDIS® Advanced Illness and Frailty Guide

The National Committee for Quality Assurance (NCQA) allows additional exclusions to Healthcare Effectiveness Data and Information Set (HEDIS®) Star measures for patients with advanced illness and frailty.

- Services measured by NCQA may not benefit older adults with limited life expectancy and advanced illness.
- Unnecessary tests or treatments could burden these patients or even be harmful.
- NCQA encourages practitioners to focus on appropriate care for their patients.

This guide includes:

- Measure specific exclusionary criteria according to age group
- Billing codes and definitions for advanced illness and frailty exclusions
- Dementia medications

Tips for coding

- Appropriate billing and coding can substantially reduce medical record requests for HEDIS® data collection purposes.
- Advanced illness and frailty must be documented in the medical record and billed with the appropriate exclusion codes.
- Virtual care visits are acceptable when used to exclude a patient.
- Appropriate coding must be billed to meet exclusion criteria:
 - **Advanced illness:**
 - At least two different dates of service with an advanced illness diagnosis during the **measurement year or the year prior**
 - Or
 - A dispensed dementia medication during the **measurement year or the year prior**
 - **Frailty:**
 - At least two indications of frailty with different dates of service during the **measurement year**

Note: Exception for OMW - both indications of frailty can occur from July 1 of the year prior through December 31 of the measurement year.
