

Medical Drug and Step Therapy Prior Authorization List for Medicare Plus BlueSM and BCN AdvantageSM members

Revised Jan. 9, 2023

This document lists the medical benefit drugs that have authorization or step therapy requirements for Medicare Advantage members.

The “Submit authorization request through” columns in this table specify where to submit authorization requests for each drug:

- For most medical benefit drugs, including the CAR-T cell therapy drugs Abecma[®], Breyanzi[®], Carvykti[™], Kymriah[®], Tecartus[®] and Yescarta[®], you’ll submit authorization requests through the NovoLogix[®] online tool.
- For medical oncology and supportive care drugs, you’ll submit authorization requests to AIM Specialty Health[®].

Note: If this list specifies that you should submit an authorization request through AIM but you’re prescribing the drug for a **non-oncology** diagnosis, **don’t** submit the request to AIM. Instead, call the Pharmacy Clinical Help Desk at 1-800-437-3803.

To view our medical policies for medical benefit drugs, see the [For Providers: How Do I Submit a Drug Prior Authorization Request for Medicare Plus Blue PPO and BCN Advantage](#) page of our **bcbsm.com** website.

See the revision history at the end of this document for information about changes to this list.

HCPCS codes	Generic name	Trade name	Step therapy requirement	Prior authorization requirement effective date		Submit authorization request through	
				Medicare Plus Blue	BCN Advantage	NovoLogix	AIM
G2082	Esketamine	Spravato [®] (up to 56 mg plus observation)	✓	2020	2020	✓	
G2083	Esketamine	Spravato [®] (greater than 56 mg plus observation)	✓	2020	2020	✓	
J0129	Abatacept	Orencia [®]	✓ Try/fail Inflectra[®] or Avsola[®] . These preferred drugs don’t require authorization.	2017	2018	✓
