## Blue Cross Virtual Dental Care

**Blue Cross Virtual Dental Care provides your employees with more options for 24/7 urgent dental care.**

Your employees can experience urgent dental needs at any time, prompting emergency room visits when their regular dentists are unavailable. Emergency room visits are costly to you and your employees, but by giving your employees more dental care options you can deter unnecessary emergency room use.

Virtual Dental Care provides members with 24/7 guidance and support until they can get into to see their regular dentist, helping members avoid the emergency room, when possible, and saving you and your employees money.

Virtual Dental Care is a standard, in-network benefit with all Blue Dental plans, at no additional cost. Member responsible for coinsurance, if any, from visit.

Members can access Virtual Dental Care when searching for a dentist in their [member account](#), through [mibluedentist.com](https://mibluedentist.com) or direct at [teledentistry.com/blue-cross-blue-shield-michigan-virtual-dental-services](https://teledentistry.com/blue-cross-blue-shield-michigan-virtual-dental-services).
