What is Medicare?

Medicare is the federal health insurance program for:

- Americans age 65 and older
- People under age 65 who have received Social Security disability benefits for 24 months
- People diagnosed with end-stage renal disease
Medicare coverage is divided into four parts.
Medicare Part A is hospital coverage.

Covered services include:

- Hospital care
- Skilled nursing facility care
- Hospice care
- Home health care

You do not pay a monthly premium for Part A coverage if:

- You or your spouse paid Medicare taxes while working
- You currently collect Social Security benefits
- You’re eligible to receive Social Security benefits but haven’t started to collect
Medicare Part B is medical coverage.

Covered services include:

- Doctor visits
- Some preventive services
- Lab tests
- Durable medical equipment

Medicare Part B costs:

- You pay a monthly premium for Original Medicare’s Part B
- Most people pay $104.90 per month
- Deducted from your Social Security benefits
Medicare Parts A and B make up Original Medicare.
Medicare Part C is Medicare Advantage.

Medicare Part C combines the coverage of Original Medicare with private insurance.

Covered services include:

- Includes everything covered by Original Medicare
- Additional covered services

Medicare Part C costs:

- A monthly premium for Medicare Advantage coverage is deducted from your Retirement System pension payments.
Medicare Part D is prescription drug coverage.

Covered services include:
- Prescription drugs through CatamaranRx*

Medicare Part D costs:
- A monthly premium for Part D prescription drug coverage is deducted from your Retirement System pension payments.

*CatamaranRx is an independent company contracted by the Office of Retirement Services to provide prescription drug coverage for MPSERS’ members.
