

## Drug List Exclusions for Blue Cross Blue Shield of Michigan and Blue Care Network Custom and Clinical Drug Lists

The drugs shown below aren't covered on the commercial Blue Cross Blue Shield of Michigan (PPO) and Blue Care Network (HMO) drug lists. In most cases, if you fill a prescription for one of these drugs, you'll pay the full retail price.

This list contains the class, subclass and suggested preferred alternatives for the excluded drugs. Unless otherwise listed as an alternative, the generic equivalents of the brand-name excluded drugs are also excluded.

If you're currently using one of the excluded drugs, ask your doctor if one of the following preferred alternatives is right for you. They have similar effectiveness, quality and safety but at a fraction of the cost. Our exclusions criteria are based on current medical information and have been approved by Blue Cross' Pharmacy and Therapeutics Committee. If coverage of a drug is approved as medically necessary, quantity limits may apply.

The following list isn't comprehensive. If you have a question about a drug that isn't covered and doesn't appear on this list, call the Customer Service number on the back of your Blue Cross member ID card.

### Preferred alternatives for excluded drugs

The brand names for the preferred alternatives are provided for reference. If available, the generic equivalent will be dispensed when the member fills a prescription. This list is intended as a reference guide and doesn't dictate coverage. Members should refer to their specific drug benefit information for a full list of covered drugs and requirements. Find the full drug lists and coverage requirements at [bcbsm.com/pharmacy](http://bcbsm.com/pharmacy).
