

Blue Cross Blue Shield and Blue Care Network Preferred Alternatives — January 2021

The Blue Cross and BCN Preferred Alternatives list is a helpful guide when selecting alternative prescription drugs. This list is intended as a reference guide and doesn't dictate coverage. Some Blue Cross and BCN members don't have coverage for tier 3 (non-preferred) agents, or the suggested alternatives. The brand (trade) names for the preferred alternatives are listed for reference. The generic equivalent will be dispensed when the member fills a prescription. The brand may not be covered or may require a higher copay. Prior approval or step therapy may be required for tier 3 drugs or preferred alternatives.

Members should refer to their specific drug benefit information at bcbsm.com/pharmacy for a full list of covered drugs and requirements.
