Home infusion therapy

Home infusion therapy is the continuous, slow administration of a controlled drug, nutrient, antibiotic or other fluid into a vein or other tissue on a daily, weekly or monthly basis, depending on the condition being treated and type of therapy.

Original Medicare

Original Medicare covers home infusion therapy services under several separate Part A, Part B and Part D benefit provisions. These benefit provisions include drugs, parenteral nutrition solutions, durable medical equipment, supplies and home health services.

Coverage criteria for infusion services, including drugs, durable medical equipment, and supplies is based on national coverage determination mandated by the Centers for Medicare & Medicaid Services and local coverage determinations established by Durable Medical Equipment Medicare Administrative Contractors.

Home health services, including those related to home infusion therapy, are available when the Medicare beneficiary:

• Is confined to the home
• Is under the care of a physician
• Is receiving services under a plan of care established and periodically reviewed by a physician
• Is in need of skilled nursing care on an intermittent basis or physical therapy or speech–language pathology; or
• Has a continuing need for occupational therapy.

Home health services are paid according to a prospective payment system. All services under the home health plan of care, except for durable medical equipment (includes prosthetics, orthotics, and oxygen) and osteoporosis drugs, are included in the home health prospective payment system payment amount.

Home health agencies may also become approved as DME suppliers, in which case they can submit bills for durable medical equipment, prosthetics, orthotics, and supplies services to the DME MAC in the relevant jurisdiction (as established by CMS).

Home infusion therapy coverage under Original Medicare is limited and subject to specific coverage criteria. If durable medical equipment, drugs, supplies and home health services are not covered under Medicare Part A and Part B, coverage for the home infusion drugs may fall under Part D. Ancillary services, such as durable medical equipment, supplies and nursing services are not covered under Part D.

If Medicare does not cover the ancillary services under Part A and or Part B, then the beneficiary may have to pay for these services out of his or her own pocket or opt to receive the infusion services in a covered Part A or Part B setting (e.g., physician’s office, outpatient hospital, infusion center).
Medicare Plus Blue

Medicare Plus Blue plans provide at least the same level of benefit coverage as Original Medicare (Part A and Part B) and provide enhanced benefits beyond the scope of Original Medicare within a single health care plan. This flexibility allows BCBSM to offer enriched plans by using Original Medicare as the base program and adding desired benefit options.

Since Original Medicare has very limited coverage for home infusion therapy, enhanced coverage is provided to individual Medicare Plus Blue PPO and standard Medicare Plus Blue Group PPO plans that select this benefit.

Coverage for enhanced home infusion therapy service components are provided as the member’s condition dictates, consistent with Original Medicare benefits, the enhanced Medicare Plus Blue home infusion therapy benefit or the member’s Part D or prescription drug plan.

The enhanced Medicare Plus Blue home infusion therapy benefit provides coverage for the in–home administration of infusion therapy services when the Original Medicare coverage criteria are not met. Coverage is available when the infusion therapy is:

- Prescribed by a physician within his or her scope of practice to:
  - Manage an incurable or chronic condition
  - Treat a condition that requires acute care if it can be managed safely at home
- Certified by the physician as medically necessary for the treatment of the condition
- Appropriate for use in the patient’s home
- Medical IV therapy, injectable therapy or total parenteral nutrition therapy

The following components of care are available as an enhanced Medicare Plus Blue benefit regardless of whether the patient is confined to the home:

- Nursing visits needed to:
  - Administer home infusion therapy or parenteral nutrition.
  - Instruct patient or caregivers on infusion administration techniques.
  - Provide IV access care (catheter care).
- Durable medical equipment, medical supplies and solutions needed for home infusion therapy or parenteral nutrition.

Note: Coverage for home infusion drugs that do not meet Original Medicare coverage criteria is not provided under the Medicare Plus Blue enhanced home infusion therapy benefit, however such drugs may be covered under the member’s Part D or prescription drug plan.

Nursing visits

The purpose of the nursing visit is to assess the patient’s infusion technique and the patient’s response to therapy.

- Nursing visits must correspond with the frequency of therapy (for example, therapy administered twice a month requires a nursing visit twice a month).
- The visits must be documented in the home infusion clinical record, including the start time and end time of each visit.

The nursing visit requirement does not apply in the following situations:

- When a patient or caregiver has experience in infusion administration and therefore declines nursing visits. Medicare Plus Blue will waive the nursing visit requirement, as long as the clinical record contains a physician order and documentation stating that:
  - The nursing visit requirement was explained to the family or caregiver
  - The caregiver is capable and willing to provide infusion related care, and nursing visits can be provided on an as needed basis
- When infusion services have temporarily stopped and the patient needs only catheter care.
Durable medical equipment, medical supplies and solutions
Home infusion therapy related services such as durable medical equipment, medical supplies, solutions and diluents, flushes, administrative services, professional pharmacy services, care coordination, and patient education are covered under a bundled per–diem. This per–diem rate includes all services not included in the pharmaceutical or nursing service component.

Catheter care
Catheter care is not payable when billed on the same day as medical IV therapy, total parenteral nutrition, injectable therapy or line insertion. If the patient has temporarily suspended home infusion therapy, one catheter care service is payable per day.

Injectable therapy
Injectable therapy is payable only when billed on the same day as an approved medical IV therapy.

Drugs
Medicare Plus Blue will provide coverage for all drugs or nutrients that meet Original Medicare coverage criteria. Drugs or nutrients that do not meet Original Medicare coverage criteria may be covered under the member’s Part D or prescription drug coverage.

Provider qualifications
• The provider must have a valid National Provider Identifier and must not be excluded by Medicare.
• The provider must be licensed or certified by the state and be acting within the scope of that license or certification.

Provider documentation requirements
Before providing home infusion therapy services, a provider must have on file:
• A physician’s order, certificate of medical necessity, or statement of medical necessity
• The physician’s prescription

Physician order, certificate of medical necessity and statement of medical necessity
A written physician order dated and signed, CMN or a SMN is required for each service provided. The statement must include the following information:
• Patient’s full name, address, sex and birth date
• Diagnosis related to the infusion therapy
• Dosage, infusion time, fluids, frequency and duration of medication
• The type or route of infusion administration, required equipment and supplies
• Nursing orders, to include frequency of visits, flushes, central line changes, IV restarts and other treatment orders, type of lab specimens the home infusion therapy nurse needs to obtain from the patient, and lab tests for which the physician is requesting the specimens. Nursing visits that are not authorized by the physician are not payable.

New orders
A new physician’s order, CMN or SMN necessity is required in the following situations:
• The current service is discontinued and a new one is initiated.
• The patient is hospitalized or admitted to a nursing home.
• The CMN duration (120 day maximum) has expired. The recertification must contain the same information as required on the initial physician order, CMN, or SMN.
**Physician prescription**

The prescription must include the following information:

- Patient's full name
- Prescriber’s signature and prescription date
- Prescriber’s printed name and address
- Drug name and strength
- Quantity prescribed
- Directions for use
- Number of refills authorized
- Any other information needed to comply with federal and state pharmacy laws.

A new prescription is needed with a change in drug or therapy, and after 12 months even without a change in drug or therapy. The CMN and a prescription can be combined in one document.

Home infusion therapy providers must update the physician regarding the patient’s condition at least every 30 days, or more often if necessary. Documentation of the update must be in the clinical record.

**Medical records**

The patient’s medical records must reflect the need for the care provided. This documentation must be available to Medicare Plus Blue upon request.

**Conditions for payment**

The table below specifies payment conditions for home infusion therapy.

Diagnosis restrictions

- Services that meet Original Medicare coverage criteria
- Consistent with Original Medicare.

DME, medical supplies and solutions

- Covered for:
  - Managing an incurable or chronic condition
  - A condition that requires acute care if it can be managed safely at home

Nursing services

Drugs

- Consistent with Original Medicare. If not covered, submit claim to member’s Part D or prescription drug plan

Age restrictions

- No restrictions

Reimbursement

Medicare Plus Blue plan’s maximum payment amounts for home infusion therapy benefits are available on our provider website, bcbsm.com/provider/ma in the MA enhanced benefits fee schedule.

The provider will be paid the lesser of the allowed amount or the provider’s charge, minus the member’s cost–share. This represents payment in full and providers are not allowed to balance bill the member for the difference between the allowed amount and the charge.

Allowed amounts

When home infusion therapy is administered via an external infusion pump or parenteral nutrition therapy consistent with Original Medicare coverage criteria, the Medicare Plus Blue allowed amount is consistent with Original Medicare. When the HIT coverage criteria under Original Medicare cannot be met, the Medicare Plus Blue allowed per–diem amounts will apply.

Member cost–sharing

- Medicare Plus Blue providers should collect the applicable cost–sharing from the member at the time of the service when possible. Cost–sharing refers to a flat–dollar copayment, a percentage coinsurance or a deductible. You can only collect the appropriate Medicare Plus Blue cost–sharing amounts from the member.
- If the member elects to receive a noncovered service, he or she is responsible for the entire charge associated with the noncovered service.

For detailed information about Medicare Plus Blue member’s benefits and cost–share, providers may verify member benefits via web–DENIS or call CAREN at 1–866–309–1719.
Billing instructions for members

1. Submit claims for home infusion therapy services consistent with the home infusion therapy coverage scenarios and claim formats provided in the chart titled Home Infusion Therapy Billing Instructions.
2. Use Medicare Advantage PPO unique billing requirements.
3. Report CPT/HCPCS codes and diagnosis codes to the highest level of specificity.
4. Report your National Provider Identifier number on all claims.
5. Submit claims to BCBSM or your local BCBS plan as indicated on the scenario chart.
6. Use electronic billing consistent with the direction provided in the scenario chart:
   a. Michigan providers
   b. Providers outside of Michigan should contact their local BCBS plan.

Home infusion therapy billing instructions

Claims for home infusion therapy services provided to individual Medicare Plus Blue PPO and select Medicare Plus Blue Group PPO members should be completed and submitted consistent with the home infusion therapy coverage scenarios identified in the following chart.

These scenarios and related billing instructions vary by the type of coverage available for the home infusion therapy service:

- Original Medicare
- Enhanced Medicare Plus Blue benefits
- Prescription drug coverage

### Scenario 1 – All HIT services meet Original Medicare coverage criteria

<table>

### Home infusion therapy enhanced benefit billing guidelines

Medicare Plus Blue billing guidelines for home infusion therapy services that do not meet Original Medicare coverage criteria are provided below.

Nursing services and durable medical equipment, supplies and solutions must all be reported on the same CMS-1500 or electronic equivalent claim.

<table>
<thead>
<tr>
<th>To Report</th>
<th>Item Reported</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Durable medical equipment, supplies and solutions</td>
<td>Date of service</td>
<td>Report the date of service as an individual date or a range of dates, depending on the number of days reported. The dates of service for per diem S procedure codes must correspond with the beginning and end dates the patient received home infusion services.</td>
</tr>
<tr>
<td></td>
<td>Code</td>
<td>Report the appropriate per diem S procedure code.</td>
</tr>
</tbody>
</table>
|                                                                          | Modifiers      | Multiple therapies should be reported using modifier SH or SJ. Report the primary therapy administration procedure code and include modifier SH or SJ to distinguish delivery of additional therapies:  
- SH – Second concurrently administered infusion therapy  
- SJ – Third or more concurrently administered infusion therapy  
**Note:** Multiple therapies are only payable with medical IV therapy or TPN therapy. The same payment amount will be made per day regardless of the number of additional concurrent therapies. |
<p>|                                                                          | Quantity       | Enter the total number of days the patient was infused for the therapy. The quantity (days) must be greater than zero. <strong>Note:</strong> S codes cannot be processed without a quantity. |</p>

Home Infusion Therapy

DME, SUPPLIES, DRUGS, HOME HEALTH SERVICES
Does the home infusion therapy, parenteral nutrition therapy, or home health services meet the Original Medicare coverage criteria?

- **YES**
  - Follow Original Medicare billing guidelines.
  - **DME, SUPPLIES & DRUGS**
    - Bill DME, supplies and drugs subject to DME regional carrier jurisdiction to Blue Cross Blue Shield of Michigan on a CMS-1500 claim form.
  - **HOME HEALTH SERVICES**
    - Bill the home health services to your local Blue plan on a UB-04 or electronic equivalent.

- **NO**
  - Follow BCBSM Medicare Plus Blue enhanced HIT benefit billing guidelines.
  - **DME, SUPPLIES & SOLUTIONS AND NURSING SERVICES**
    - Bill DME, supplies and solutions and nursing services to your local Blue plan on the same CMS-1500 or electronic equivalent.
    - Bill DME, supplies and solutions with the appropriate per diem S code.
    - Bill nursing services with codes 99601 and 99602.
  - **DRUGS**
    - Bill the home infusion drugs to the member’s Part D or prescription drug plan consistent with their billing guidelines.
