COVID-19 MDHHS guidance on collection and testing

Blue Cross Blue Shield of Michigan and Blue Care Network are bringing you an important message from the Michigan Department of Health and Human Services* outlining the criteria for testing when the specimens are processed through the state laboratory and other important testing information.

Please keep in mind that clinical criteria are evolving along with the availability of testing and the commercial laboratories allow testing based on the physician’s clinical judgment.

Please also see the COVID-19 patient testing recommendations we shared with you March 18, and continue to visit our Coronavirus (COVID-19) information updates for providers webpage.
