

New procedure codes for Pfizer COVID-19 vaccines are denying incorrectly for BCN commercial

The following procedure codes for the Pfizer COVID-19 vaccine **for children ages 6 months to 4 years** are denying with EX code BJV – Missing NDC Value on Blue Care Network commercial claims:

- *91308 — Pediatric Pfizer vaccine
- *0081A — Administration of pediatric Pfizer vaccine, first dose
- *0082A — Administration of pediatric Pfizer vaccine, second dose
- *0083A — Administration of pediatric Pfizer vaccine, third dose

We're updating our systems to correct this issue. When the update is in place:

- *91308 will continue to deny, but it will deny as “inclusive” because the cost of the vaccine is covered by the government during the public health emergency.
- *0081A, *0082A and *0083A will be payable.

We'll automatically reprocess claims that were affected by this issue. You don't need to resubmit claims.

We apologize for the inconvenience and thank you for your patience.
