

We've updated our *COVID-19 patient testing recommendations* document

We've made the following changes to our *COVID-19 patient testing recommendations* document:

- In the “Codes for clinical diagnostic laboratory testing” section, we added information about HCPCS codes U0003 and U0004. The Centers for Medicare & Medicaid Services created these new codes, which are for lab tests that use high-throughput technologies to test for COVID-19.
- In the “Priorities for testing” section:
 - We now link to the [Michigan Interim COVID-19 Person Under Investigation \(PUI\) Case Report Form](#).^{*} for guidance on priorities for testing.
 - We added information about ordering testing and reporting test results.

For full details, see the [COVID-19 patient testing recommendations](#) document. You can find this document in the patient testing sections of our coronavirus webpages, which are available through Provider Secured Services and on our public website at bcbsm.com/coronavirus (click [For Providers](#)).
