

## Ambulance providers should use POS 60 to bill for COVID-19 vaccine administration

Ambulance providers can administer COVID-19 vaccines and monoclonal antibodies to Medicare Advantage members if they follow Medicare's enrollment process to become a mass immunizer.

Ambulance providers should use place of service code 60. Visit [Enrollment for Administering COVID-19 Vaccines](#)\* for more information. Roster billers should use POS 60 regardless of their provider type, even if they're not a mass immunization roster biller (provider specialty type 73).

For additional information on billing for COVID-19 vaccines and monoclonal antibodies, visit CMS' webpage on [Medicare billing for COVID-19 vaccine administration](#)\*. Per CMS, the process for billing for monoclonal antibodies is the same as for COVID vaccines.
